Dear Editors:

We have just finished reading your coverage of the story on Shirt-free Revolution in the October issue of your paper and want to send our warmest thank-yous for that report. We have been working to change New York State law* which prohibits women from taking off their shirts wherever men have that option. Some of this work has included direct action which resulted in court trials, fines and probation, so we are much in support and appreciation for what the Madison women are experiencing as a result of their action at B.B. Clarke beach.

Accomplishing social change is hard enough work without being separated from others who are working for the same thing. Your report has served a vital purpose by putting us in touch with women who are also struggling for top-free equality. Please see that they get the enclosed letter and materials we are sending to them.

Thank you and keep up the important work that you do.

Sincerely,

Lynn Hiller Kathie Reilly
